

FS4 & FS5 Fireman's Override Switch

DATA SHEET

A vandal resistant stainless steel Fireman's Override Switch engraved Fireman's Switch or Emergency Switch in RED.

These models can be housed in either a bevelled or overlap back box and the cut out size is 115mm. x 115mm. x 75 mm. in both cases.

Manufactured as standard in 316 swg marine finish. Where units are subjected to severe salt-water conditions, these fire switches are very robust.

In the case of the bevelled version the fire switch plate is recessed by 10 mm

Both switches are available in Single Pole or Double Pole Double Throw formats.

Keys to operate these two types are as follows:

FS4 

BEZELLED STYLE

BEZELLED

FS4/BZ
FS4/BZ/DP
FS5/BZ
FS5/BZ/DP

FS5 

OVERLAP STYLE

OVERLAP

FS4
FS4/DP
FS5
FS5/DP

The Double Pole allows the installer to wire the switch to operate a time release and if the key is held in the engaged position remove the supply to the locking device.

The overlap style is available in a flush version with a surface back box **or** red powder coped back box.

The benefits of recent changes:

The fire switch has 3 sections and extra cabling room allowing the cables to be dressed more easily.

The fire switch receptacle tube is now extended to improve alignment and eliminate front plate scratching.

Balanced in appearance with the PAC20085 Stand Alone Reader
