

Disability Discrimination Act Features

Entrotec are specialising in DDA requirements

Panels incorporating our no moving parts Pressure Sensitive Buttons are now being used as standard by more and more Local Authorities & Housing Associations

Digital Panel

Functional / Low Rise Panel

- Mitred Bezelled Panel
- Speaker Amp Grill
- Standard Operating Instructions 6mm Sentence case
- LED Display
- Pressure Sensitive Buttons
- Standard telephone keypad layout With raised pimple on No 5
- Engraved Block Name Optional
- MLRYEL (LED Display)
- Standard English (Grade 2) Braille. Number with lead in character
- Yellow Rings on Pressure Sensitive Buttons
- YELPAC PAC Reader 20085

If Braille is required on a digital panel we can engrave CALL and CANCEL. There will also be a pimple on the number 5

Braille numbering on a functional panel is engraved to the left of each call button

If full RNIB and DDA approval is required on door panels we can also offer English Standard Braille engraving on the operating instructions

Digital Instructions

- *Dial number then press call
- *If number incorrect press cancel

Digital Instructions

- *For Entry press button and wait for reply

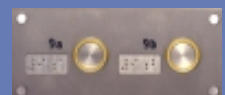

To aid the partially sighted we can engrave a yellow ring on each call button. We can also offer our MLR read-out board, which has a yellow background with LEDs for Door Open, System Calling, System Busy & Speak Now Facility
